Irrigation Booms Control

RF300Wifi

Comfortable and accessible

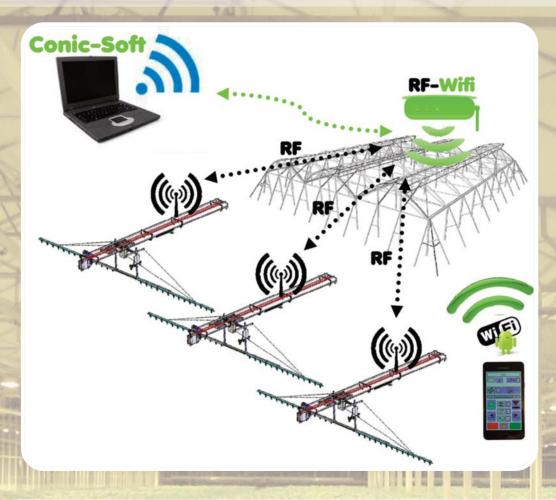

RF300 is a wireless control system for irrigation booms. By a simple application for Android devices you can control any type of irrigation. Available for use on phones and tablets, you can also link up with nursery management program Conic-Soft fully integrating all the management of the nursery.

IRRIGATION MANAGEMENT

Android Application allows direct control of irrigation booms. Timing and zones programming for complete management of greenhouses.

RF control is compatible with any model of irrigation, old irrigations, different manufacturers; this allows integrating all the booms in one management system.

Also supports management by computer for more functions and complete irrigation and production records.

ADMINISTRATIVE MANAGEMENT

The wireless connection allows connection to the management program Conic-Soft. Integrating irrigation management in a complete database to control orders, delivery notes and invoices. A tool for complete management of the nursery.
