

FAST

ACCURATE

RELIABLE

Automated grafting machine

EMP-300

New grafting machine EMP-300, prepare to graft vegetables with flexible clips. Designed to allow handy and efficient work, with simple mechanics and easy adjustments. The ease of use allows it to be used by any operator to arrange production of 400 to 600 grafted plants per hour.

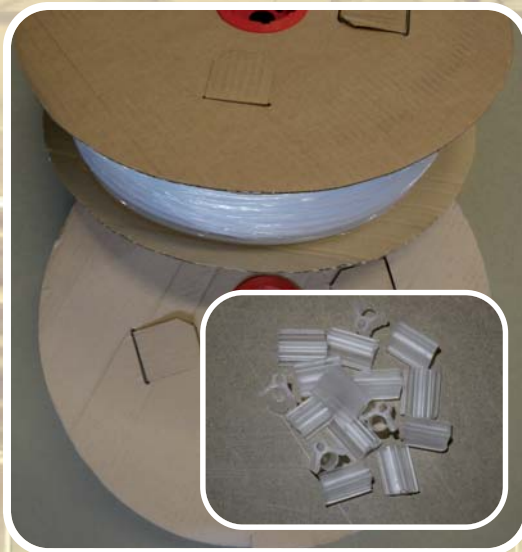

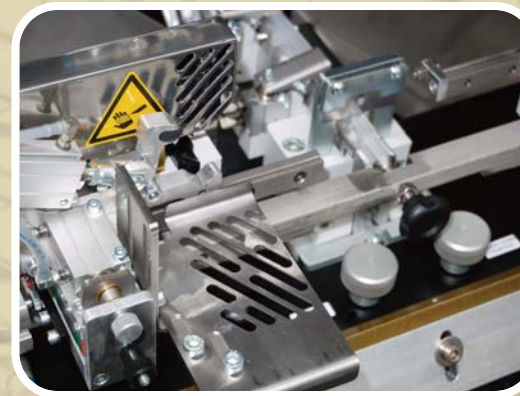

Cut unit can work with different configurations (15°-30°), and with simple adjustments, different types of plants and root stock.

Clips are made of flexible material, especially designed for a solid fixation. There are different sizes and have a hole to hold the grafted plant.

The knives to cut the stem are very easy to change. The cutting unit can be configured to cut at different angles.

Accurate design, simple mechanics, insures maximum accuracy and reliability in every grafted plant.

Clips for grafting plants are available in different diameters, and prepared in rollers. The machine automatically supplies the clip roller, cut individually at the moment of grafting.

The cutting unit has a disinfectant application. Disinfection cycle can be adjusted to follow the work patterns.
